6. ACCIDENTAL RELEASE MEASURES

Spills

In the event of a major spill, prevent spillage from entering drains or water courses. Avoid subsoil penetration.

Wear full protective clothing including eye/face protection and impervious elbow-length gloves. Evacuate general area and deny access to unnecessary and unprotected personnel. Ventilate area of leak or spill (especially in confined areas).

Stop leak if safe to do so and contain spill. Absorb with an inert material (diatomaceous earth, vermiculite, sand, earth). Collect the material and place into clearly labeled containers for subsequent disposal.

Note: Contaminated surfaces will be extremely slippery. Avoid accidents, clean up immediately.

Handling

Use of safe work practices are recommended to avoid eye or skin contact and inhalation. Observe good personal hygiene, including washing hands before eating. Provide adequate ventilation.

Storage

Avoid formation of aerosol.

Store in a cool, dry, well-ventilated area. Keep containers tightly closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Standards (Safe Work Australia) Engineering Controls

No exposure standards set.

Local exhaust ventilation is recommended when vapours can be released in excess of established airborne exposure limits.
